### III. Topic Index

---

- AAHPERD.** 1958–2008: 50 Years of Youth Fitness Tests in the United States; 1, 1–11.
- Accelerometer.** Individual Information-Centered Approach for Handling Physical Activity Missing Data; 2, 131–137.
- Accelerometer.** The Utility of Shorter Epochs in Direct Motion Monitoring; 3, 460–468.
- Accelerometry.** Influence of Activity Monitor Location and Bout Duration on Free-Living Physical Activity; 3, 424–433.
- Account making.** Aggression in Soccer: An Exploratory Study of Accounts Preference; 2, 398–402.
- Actigraph.** Assessing Physical Activity in Children With Asthma: Convergent Validity Between Accelerometer and Electronic Diary Data; 2, 153–163.
- Activity counts.** Estimating Energy Expenditure With the RT3 Triaxial Accelerometer; 2, 249–256.
- Acute.** Cortisol Response to Physical Activity in African American Toddlers Attending Full-Time Day Care; 4, 739–746.
- Adolescent.** Interrater Objectivity for Field-Based Fundamental Motor Skill Assessment; 2, 363–368.
- Adolescents.** Give or Take a Few? Comparing Measured and Self-Reported Height and Weight as Correlates of Social Physique Anxiety; 3, 656–662.
- Adolescents.** Specific Circuit Training in Young Judokas: Effects of Rest Duration; 2, 146–152.
- African American male athletes.** African American Football Athletes' Perspectives on Institutional Integrity in College Sport; 1, 102–116.
- After-school program.** Navigating Two Cultures: An Investigation of Cultures of a Responsibility-Based Physical Activity Program and School; 2, 230–240.
- Age-categories.** Relative Age Effect in Masters Sports: Replication and Extension; 3, 669–675.
- Aggressive behaviors.** Aggression in Soccer: An Exploratory Study of Accounts Preference; 2, 398–402.
- Aging.** Decreasing Sports Activity With Increasing Age? Findings From a 20-Year Longitudinal and Cohort Sequence Analysis; 1, 22–31.
- Aging.** Relative Age Effect in Masters Sports: Replication and Extension; 3, 669–675.
- Anthropometry.** Body Mass and Circumference of Upper Arm Are Associated With Race Performance in Ultraendurance Runners in a Multistage Race—The Isarrun 2006; 2, 262–268.
- Anthropometry.** No Change of Body Mass, Fat Mass, and Skeletal Muscle Mass in Ultraendurance Swimmers After 12 Hours of Swimming; 1, 62–70.
- Apology.** Aggression in Soccer: An Exploratory Study of Accounts Preference; 2, 398–402.
- Approach-avoidance goal.** Sport Ability Beliefs, 2 x 2 Achievement Goals, and Intrinsic Motivation: The Moderating Role of Perceived Competence in Sport and Exercise; 2, 303–312.

- Arabs. *Quantity, Type, and Correlates of Physical Activity Among American Middle Eastern University Students*; 3, 412–423.
- Assessment. *Expected Values for Pedometer-Determined Physical Activity in Youth*; 2, 164–174.
- Assessment. *Statewide Physical Fitness Testing: A BIG Waist or a BIG Waste?* 4, 696–701.
- Assessment. *Urban Minority Ninth-Grade Students' Health-Related Fitness Knowledge*; 4, 747–755.
- Assistantship. *A Survey of Basic Instructional Program Graduate Teaching Assistant Development and Support Processes*; 4, 792–795.
- Athletic performance. *The Effect of Biological Movement Variability on the Performance of the Golf Swing in High- and Low-Handicapped Players*; 2, 185–196.
- Athletics. *Crossing the Line: Rites of Passage, Team Aspects, and Ambiguity of Hazing*; 2, 290–302.
- Athletics. *Give or Take a Few? Comparing Measured and Self-Reported Height and Weight as Correlates of Social Physique Anxiety*; 3, 656–662.
- At-risk youth. *Navigating Two Cultures: An Investigation of Cultures of a Responsibility-Based Physical Activity Program and School*; 2, 230–240.
- Attention. *Attentional Demands on Motor-Respiratory Coordination*; 3, 510–523.
- Auditory cues. *How Do Batters Use Visual, Auditory, and Tactile Information About the Success of a Baseball Swing?* 3, 491–501.
- Automatic processes. *Automatic Activation of Exercise and Sedentary Stereotypes*; 3, 633–640.
- Barriers. *Health Worry, Physical Activity Participation, and Walking Difficulty Among Older Adults: A Mediation Analysis*; 1, 12–21.
- Basketball. *Free-Throw Shooting During Dual-Task Performance: Implications for Attentional Demand and Performance*; 4, 718–726.
- Behavioral regulation. *A Cross-Cultural Validation of Perceived Locus of Causality Scale in Physical Education Context*; 2, 313–325.
- Birth date. *The Relative Age Effect in Elite Sport: The French Case*; 2, 336–344.
- Blood lactate concentration. *Specific Circuit Training in Young Judokas: Effects of Rest Duration*; 2, 146–152.
- Body composition. *Body Mass and Circumference of Upper Arm Are Associated With Race Performance in Ultraendurance Runners in a Multistage Race—The Isarrun 2006*; 2, 262–268.
- Body composition. *Estimating Energy Expenditure With the RT3 Triaxial Accelerometer*; 2, 249–256.
- Body composition. *Increase of Total Body Water With Decrease of Body Mass While Running 100 km Nonstop—Formation of Edema?* 3, 593–603.
- Body composition. *Moderate Association of Anthropometry, But Not Training Volume, With Race Performance in Male Ultraendurance Cyclists*; 3, 563–568.
- Body fat. *Eight-Week Traditional Mat Pilates Training-Program Effects on Adult Fitness Characteristics*; 3, 569–574.
- Body image. *An Examination of Psychosocial Correlates of Eating Disorders Among Female Collegiate Athletes*; 3, 621–632.
- Breathing. *Attentional Demands on Motor-Respiratory Coordination*; 3, 510–523.
- Burnout. *Predicting Changes in Athletes' Well Being From Changes in Need Satisfaction Over the Course of a Competitive Season*; 2, 386–392.
- Capacity theory. *Free-Throw Shooting During Dual-Task Performance: Implications for Attentional Demand and Performance*; 4, 718–726.
- Cardiorespiratory fitness. *Effects of Teacher Autonomy Support and Students' Autonomous Motivation on Learning in Physical Education*; 1, 44–53.
- Cardiovascular response. *Comparison of Heart Rate Response to Tennis Activity Between Persons With and Without Spinal Cord Injuries: Implications for a Training Threshold*; 1, 71–77.
- Categorization. *Examining the Relationships Among Coaching Staff Diversity, Perceptions of Diversity, Value Congruence, and Life Satisfaction*; 2, 326–335.
- Chat rooms. *E-Mentoring in Physical Education: Promises and Pitfalls*; 3, 552–562.
- Child. *The Utility of Shorter Epochs in Direct Motion Monitoring*; 3, 460–468.
- Childbirth. *Pre- and Postnatal Women's Leisure Time Physical Activity Patterns: A Multilevel Longitudinal Analysis*; 3, 403–411.
- Children. *1958–2008: 50 Years of Youth Fitness Tests in the United States*; 1, 1–11.
- Children. *Expected Values for Pedometer-Determined Physical Activity in Youth*; 2, 164–174.
- Cholesterol. *Regular Exercise and Plasma Lipid Levels Associated With the Risk of Coronary Heart Disease: A 20-Year Longitudinal Study*; 2, 138–145.
- Circle drawing. *Factors Influencing Children's Performances of a Steady-State Bimanual Coordination Task*; 2, 205–212.
- Cognition. *Guiding Visual Attention in Decision Making—Verbal Instructions Versus Flicker Cueing*; 2, 369–374.
- Cognitive abilities. *Physical Activity as a Moderator of the Relationship Between Aging and Inductive Reasoning*; 2, 393–397.
- College sport reform issues. *African American Football Athletes' Perspectives on Institutional Integrity in College Sport*; 1, 102–116.
- Communication software. *Intrateam Communication and Performance in Doubles Tennis*; 2, 281–290.
- Community. *Preadolescent Female Development Through Sport and Physical Activity: A Case Study of an Urban After-School Program*; 1, 87–101.
- Competition. *Effect of the 3-Point Line Change on the Game Dynamics in Girls' Minibasketball*; 3, 502–509.
- Complexity. *Social Psychology and Physical Activity: Back to the Future*; 4, 685–695.
- Compositional demography. *Examining the Relationships Among Coaching Staff Diversity, Perceptions of Diversity, Value Congruence, and Life Satisfaction*; 2, 326–335.
- Conditioning. *Ice Hockey Players Using a Weighted Implement When Training on the Ice: A Randomized Control Trial*; 1, 54–61.
- Conferences. *Trends in International Research Presented Through the Research Consortium of the American Alliance for Health, Physical Education, Recreation and Dance (1965–2008)*; 3, 454–459.
- Confirmatory factor analysis. *Factorial Validity and Gender Invariance of the Physical Activity Enjoyment Scale (PACES) in Older Adolescents*; 1, 117–121.
- Context. *Attitudes Toward Overweight Individuals Among Fitness Center Employees: An Examination of Contextual Effects*; 3, 641–647.
- Context interference. *Conditions of Practice in Perceptual Skill Learning*; 1, 32–43.
- Continuous. *Factors Influencing Children's Performances of a Steady-State Bimanual Coordination Task*; 2, 205–212.
- Coordination. *Intrateam Communication and Performance in Doubles Tennis*; 2, 281–290.

- Core training. *Eight-Week Traditional Mat Pilates Training-Program Effects on Adult Fitness Characteristics*; 3, 569–574.
- Critical qualitative research. *African American Football Athletes' Perspectives on Institutional Integrity in College Sport*; 1, 102–116.
- Cross-sectional design. *Physical Activity as a Moderator of the Relationship Between Aging and Inductive Reasoning*; 2, 393–397.
- Cultural studies. *Quantity, Type, and Correlates of Physical Activity Among American Middle Eastern University Students*; 3, 412–423.
- Cybermentoring. *E-Mentoring in Physical Education: Promises and Pitfalls*; 3, 552–562.
- Data analysis tool. *Intrateam Communication and Performance in Doubles Tennis*; 2, 281–290.
- Data quality. *Assessing Physical Activity in Children With Asthma: Convergent Validity Between Accelerometer and Electronic Diary Data*; 2, 153–163.
- Demonstrations. *Effect of Information Load and Time on Observational Learning*; 3, 480–490.
- Developmental levels. *Give or Take a Few? Comparing Measured and Self-Reported Height and Weight as Correlates of Social Physique Anxiety*; 3, 656–662.
- Diabetes. *The DiabetAction Program: Implementation in Community-Based Settings*; 3, 583–592.
- Diary methods. *Assessing Physical Activity in Children With Asthma: Convergent Validity Between Accelerometer and Electronic Diary Data*; 2, 153–163.
- Disability sport. *Comparison of Heart Rate Response to Tennis Activity Between Persons With and Without Spinal Cord Injuries: Implications for a Training Threshold*; 1, 71–77.
- Dual task. *Attentional Demands on Motor-Respiratory Coordination*; 3, 510–523.
- Dualisms. *Social Psychology and Physical Activity: Back to the Future*; 4, 685–695.
- Dual-task paradigm. *Free-Throw Shooting During Dual-Task Performance: Implications for Attentional Demand and Performance*; 4, 718–726.
- Dynamic systems. *Throwing Pattern: Changes in Timing of Joint Lag According to Age Between and Within Skill Level*; 2, 213–222.
- Easy-to-hard effect. *Conditions of Practice in Perceptual Skill Learning*; 1, 32–43.
- Educational development. *African American Football Athletes' Perspectives on Institutional Integrity in College Sport*; 1, 102–116.
- Energy expenditure. *Influence of Activity Monitor Location and Bout Duration on Free-Living Physical Activity*; 3, 424–433.
- Entity and incremental beliefs. *Sport Ability Beliefs, 2 x 2 Achievement Goals, and Intrinsic Motivation: The Moderating Role of Perceived Competence in Sport and Exercise*; 2, 303–312.
- Epidemiology. *Quantity, Type, and Correlates of Physical Activity Among American Middle Eastern University Students*; 3, 412–423.
- Epoch. *The Utility of Shorter Epochs in Direct Motion Monitoring*; 3, 460–468.
- Ergometry. *Desaturation Patterns Detected by Oximetry in a Large Population of Athletes*; 2, 241–248.
- Evaluation. *Statewide Physical Fitness Testing: A BIG Waist or a BIG Waste?* 4, 696–701.
- Evidence-based practice. *Social Psychology and Physical Activity: Back to the Future*; 4, 685–695.
- Exercise. *Assessment of Differing Definitions of Accelerometer Non-wear Time*; 2, 355–362.
- Exercise. *Expected Values for Pedometer-Determined Physical Activity in Youth*; 2, 164–174.
- Exercise. *Older Adults' Perceived Changes in Physical Self-Worth Associated With Resistance Training*; 2, 269–280.
- Exercise. *Pre- and Postnatal Women's Leisure Time Physical Activity Patterns: A Multilevel Longitudinal Analysis*; 3, 403–411.
- Exercise. *Total Protein of Whole Saliva as a Biomarker of Anaerobic Threshold*; 3, 604–610.
- Exercise evaluation. *Comparison of Heart Rate Response to Tennis Activity Between Persons With and Without Spinal Cord Injuries: Implications for a Training Threshold*; 1, 71–77.
- Exercise prescription. *Comparison of Heart Rate Response to Tennis Activity Between Persons With and Without Spinal Cord Injuries: Implications for a Training Threshold*; 1, 71–77.
- Exercise training. *The Effects of a 12-Week Walking Program on Community-Dwelling Older Adults*; 3, 524–532.
- Exhaustive exercise. *Desaturation Patterns Detected by Oximetry in a Large Population of Athletes*; 2, 241–248.
- Expectancy-related beliefs. *Ability Beliefs, Task Value, and Performance as a Function of Race in a Dart-Throwing Task*; 1, 122–130.
- Experience level. *The Effect of Biological Movement Variability on the Performance of the Golf Swing in High- and Low-Handicapped Players*; 2, 185–196.
- Explicit. *Attitudes Toward Overweight Individuals Among Fitness Center Employees: An Examination of Contextual Effects*; 3, 641–647.
- Factory employees. *Psychological Need Fulfillment Among Workers in an Exercise Intervention: A Qualitative Investigation*; 4, 774–787.
- Fat mass. *Body Mass and Circumference of Upper Arm Are Associated With Race Performance in Ultraendurance Runners in a Multistage Race—The Isarrun 2006*; 2, 262–268.
- Feedback. *Conditions of Practice in Perceptual Skill Learning*; 1, 32–43.
- Feedback. *Knowledge of Results After Good Trials Enhances Learning in Older Adults*; 3, 663–668.
- Femininity. *Gender Stereotyping and the Influence of Race in Sport Among Adolescents*; 3, 676–684.
- Fitness. *The DiabetAction Program: Implementation in Community-Based Settings*; 3, 583–592.
- Fitness levels. *The Impact of an Obstacle Course Sport Education Season on Students' Aerobic Fitness Levels*; 4, 788–791.
- Flexibility. *A Single 30-s Stretch Is Sufficient to Inhibit Maximal Voluntary Strength*; 2, 257–261.
- Flexibility. *Eight-Week Traditional Mat Pilates Training-Program Effects on Adult Fitness Characteristics*; 3, 569–574.
- Focus of attention. *Attentional Mechanisms in Sports Via Brain-Electrical Event-Related Potentials*; 4, 727–738.
- Fractionated response time. *Exploring the Relationship Between Exercise-Induced Arousal and Cognition Using Fractionated Response Time*; 1, 78–86.
- French professional championships. *The Relative Age Effect in Elite Sport: The French Case*; 2, 336–344.
- Friendship. *Peers and Teachers as Sources of Relatedness Perceptions, Motivation, and Affective Responses in Physical Education*; 4, 765–773.
- Fundamental motor skills. *Instructional Climates in Preschool Children Who Are At-Risk. Part I: Object-Control Skill Development*; 3, 533–542.
- Gerontology. *Health Worry, Physical Activity Participation, and Walking Difficulty Among Older Adults: A Mediation Analysis*; 1, 12–21.

- Habitus. *Complicating the "Soccer Mom": The Cultural Politics of Forming Class-Based Identity, Distinction, and Necessity*; 2, 345–354.
- Hand-held computer. *Assessing Physical Activity in Children With Asthma: Convergent Validity Between Accelerometer and Electronic Diary Data*; 2, 153–163.
- Health behavior. *Quantity, Type, and Correlates of Physical Activity Among American Middle Eastern University Students*; 3, 412–423.
- Health status. *The Effects of a 12-Week Walking Program on Community-Dwelling Older Adults*; 3, 524–532.
- Health-related. *1958–2008: 50 Years of Youth Fitness Tests in the United States*; 1, 1–11.
- Healthy individuals. *One- or Two-Legged Standing: What Is the More Suitable Protocol to Assess the Postural Effects of the Rigid Ankle Orthosis?* 4, 702–709.
- Heart rate. *Specific Circuit Training in Young Judokas: Effects of Rest Duration*; 2, 146–152.
- High school. *Urban Minority Ninth-Grade Students' Health-Related Fitness Knowledge*; 4, 747–755.
- History of science. *Trends in International Research Presented Through the Research Consortium of the American Alliance for Health, Physical Education, Recreation and Dance (1965–2008)*; 3, 454–459.
- Implicit. *Attitudes Toward Overweight Individuals Among Fitness Center Employees: An Examination of Contextual Effects*; 3, 641–647.
- Individual trajectory. *Pre- and Postnatal Women's Leisure Time Physical Activity Patterns: A Multilevel Longitudinal Analysis*; 3, 403–411.
- Intermittent exercise. *Specific Circuit Training in Young Judokas: Effects of Rest Duration*; 2, 146–152.
- Internalization. *An Examination of Psychosocial Correlates of Eating Disorders Among Female Collegiate Athletes*; 3, 621–632.
- Intervention strategy. *Effect of Pedometer-Based Physical Activity Interventions: A Meta-Analysis*; 3, 648–655.
- Inverted-U hypothesis. *Exploring the Relationship Between Exercise-Induced Arousal and Cognition Using Fractionated Response Time*; 1, 78–86.
